Arizona Bird Committee

Field Checklist of the Birds of Arizona

Checklist available at http://abc.azfo.org
Updated April 01 2023
Field Checklist of The Birds of Arizona

This checklist contains 570 species of birds that have been accepted by the Arizona Bird Committee as of January 2023. An additional 8 subspecies that occur in Arizona and are reviewed have been included. Identifiable subspecies and their common names are derived from eBird Taxonomy, available online at: http://ebird.org/

The species list conforms to the American Ornithologists' Society (AOS), checklist order and nomenclature as of the 63rd supplement published July 2022.

Checklist annotations:

- **n** = Has bred in Arizona (309 taxa). A species that has hatched young at least once, however, this does not include hybrid offspring.
- **[]** = Species in brackets have not been physically documented in Arizona (2 species)
- **[*]** = Arizona Bird Committee review species (153 taxa)
- **italics** = Species in italics are identifiable review subspecies (8)
- **(int)** = Introduced (8 species)
- **(ex)** = Extirpated (4 species) previously bred or presumed to have bred in Arizona, but no longer occur naturally. They may have been reintroduced but remain unestablished.

Species or subspecies marked with an asterisk (*) should be documented with photographs and or written details. Reports of Arizona Bird Committee review species (*) may be submitted online to the Arizona Bird Committee at the Arizona Field Ornithologists Website at: www.azfo.org.

*edited and designed by Kurt Radamaker*
